

Focus

Pushes & Indicators

For your elevator, ThyssenKrupp Elevator has developed a range of buttons and indicators. "Focus" in full compliance with EN 81-70.

In car and at the landing, these interfaces and accessories "Focus" give you the opportunity to customize your elevator. Every element offers a great level of comfort in its use and provides you with the liberty and reliability you are looking for.

In car

Car operating panel available as full height in hairline stainless steel as standard, engraved or linen as an option. From a revolutionary compact design, which provides for the option of surface mounting.

Car operating panel

Buttons

The call buttons are from an improved technology, clad in stainless steel; mirror polished; and dedicated to the designated floors. An autodialler is fitted as standard. Also available are key-switches, Intercom between car and machine room. As a standard, the "star" pressel allows a car call to the main building entrance/exit.

Indication

The screen is fitted with directional arrows and an LCD indicator, pictograms for "Alarm recorded" and voice communication established in compliance with EN 81-70. The identification plate and the installer name complete this screen.

Accessories

Direction arrows are fitted in the car front return, visible from landing, in conformity with EN 81-70.

call button
